ENGLISH AS SHE IS SPOKE

We are assured by none other than the famous columnist Delos Avery that an equally famous novelist was responsible for the following example of present day Bobby-Sox language. You can try it out after the second New Year cocktail:

Pal, you're on the downbeat. Slug it slay. Your Bill certinly puts boogie in the old New England corn. Those kids really send me Roger! I gander your slick chick and snazzy squabs, they crack ankles all round here. I could throw a winding myself, hush! Zingo! Strictly from the top drawer... Whatever it is you cut the rug. You're in the groove you ride the jam, solid Jackson, terrific! Let's go down to the jukebox, the jive hive, the teen canteen, and do some barrel house jump... So help me, pal, your stuff is quiver-giver. It's on the beam, it takes me apart. Let the old fuddy-duddies take a powder. Kammataz for the droops! Let's us and the whistle-bait beat feet for the burghery. Hubba-hubba! Tonight's a swingeeroo. Good luck, pal. Ride on down. You're cooking. Plant you now, dig you later.

Columnist P. W. Luce contends that the windiest place on earth is at Portage and Main in Winnipeg. We have always understood that either Macleod or Blairmore held first place. — F.J.S. in Cranbrook/Courier.

Unemp'm't Insurance Coverage Extended

Honorable Humphrey Mitchell, minister of labor, announced Dec. 9, that on and after January 1, 1948, every monthly rated employee (employee paid by the month) whose annual remuneration does not exceed \$3,120 will be insured under the Unemployment Insurance Act, by authority of Order in Council P.C. 4845, Dec. 5, 1947.

At the present time those employees paid by the month whose annual remuneration is \$2,400 or less are insured under the Act.

The minister pointed out that the change will not affect the coverage of all hourly, daily and piece-rated employees and those paid on mileage basis, who will continue to be insured regardless of earnings. Weekly-rated employees whose earnings are not expected to be more than \$3,120 will continue as well to be insured under the Act.

Workers exposed to danger of flying particles and other hazards are urged by the department of national health and welfare to wear safety goggles. The department quotes statistics to show that 80 percent of eye accidents in factories were due to flying particles. Figures also show that 98 percent of all industrial eye accidents were preventable.

Golden Leaves

Canada Practically Grows All Of Its Tobacco Needs

TOBACCO leaves can be golden in more ways than one. The stream of wealth precipitated by the plant reached flood proportions in 1946 when Canadians paid approximately \$380,000,000 for the privilege of smoking. Of this, \$200,000,000 was mapped up in various taxes and duties. Practically all this tobacco—98 per cent.—to be exact—was home grown. A few years ago Canada was considered too far north to produce the leaf. Yet last year there were 110,358 acres harvested for a yield of 141,384,000 pounds of tobacco leaf. The \$50,000,000 cash value of the crop makes it the most valuable of all specialized Canadian crops, supporting approximately 300,000 people.

A tobacco buyer dickers with a farmer for his annual crop. Canadians spend approximately \$380,000,000 annually for the privilege of smoking.

Tobacco outlived several attempts to prohibit its use. First appearing among the Mayas of ancient Mexico and later among North American Indians, tobacco was long considered a medicine.

When the habit developed quickly, James I of England thought of suppressing it but imposed a tax instead. An effort to discourage tobacco use in Canada was abandoned in 1725. By 1897, the year of Confederation, excise tax on tobacco ne-

counted for a large percentage of the country's revenue. Within the last 20 years the Experimental Farms Service developed new varieties, improved cultural practices and advocated the use of more suitable fertilizers.

Experiments were also conducted by the tobacco division of the Federal Department of Agriculture. Methods of controlling natural enemies such as horn worms, cut worms and wire worms were discovered. Fertilizers were tested until they had ex-

Soothsayer Says Hitler Still Alive

ROME.—A Neapolitan soothsayer Achille d'Angelo announced that Adolf Hitler is living in a small town by a river in western Argentina, to which he escaped by submarine from Denmark a week before V-E Day. Signor d'Angelo, who is a self-proclaimed prophet, has acquired a wide reputation in local occult circles for his annual predictions. Last year he predicted the renewed Greek civil warfare, several earthquakes and the death of two members of the Byrd Antarctic expedition.

He did not say how he knew of Hitler's whereabouts, but he declared "he was certain Der Fuehrer was staying at the home of a wealthy Argentinian and that there were four men and a woman in his party."

SOMETHING SPECIAL ABOUT THIS FLOUR

BLANTFORD, Ont.—Back in the good old days, they made things to last.

The flour given Mr. and Mrs. S. J. Carter as a wedding present, as an example.

The flour was used to make their original wedding cake 50 years ago and when the couple celebrated their golden wedding anniversary recently, flour left over from that original wedding cake was used to make their golden wedding cake.

Casket Not To Be Opened Until 2197

BRIDLINGTON, Yorkshire.—A casket containing 1947 records of Bridlington, and a letter from the mayor, F. F. Millner, to a man who will not be born for 200 years, was buried recently under the main road leading to the town hall. Above the burial place is a paving stone with instructions that the casket is not to be dug up until 2197.

The Mayor said: "We do not know what will happen in the next 250 years, which will be the atomic age, but this casket will tell them how we lived. I had the strange experience of writing a letter to a man who will not be born for at least 200 years. It is addressed to the Mayor of Bridlington for 2197."

STOUT SHOELACES

AUCKLAND, N.Z.—A motorcyclist here owes his life to the strength of his shoelaces. He collided with a tramcar and his shoelaces caught in a bolt in the front of the car. He was dragged 30 feet with his head only two inches from the wheels.

WORLD HAPPENINGS BRIEFLY TOLD

British production of cotton yarn and cloth is at its highest point since the war.

The town hall clock in Ipswich, England, has had its first overhaul since being installed 80 years ago.

St. Bartholomew's Hospital in London recently received an anonymous gift of \$1,540 in dirty crumpled bills.

Warren Butler, 104, of Lincoln, Maine, estimates that he saw nearly 500 movies during 1947, and he adds, "I enjoyed every one of them."

A 29½-pound Dolly Varden trout caught in Lake Pend Oreille at Sandpoint, Idaho, last June will be listed as the world's record Dolly Varden by Field and Stream magazine.

There is little likelihood that grasshoppers will become a serious menace to next year's crops, J. L. Eggleston, director of pest control for the Alberta agriculture department, said.

Possibility of ships sailing the seas propelled by atomic energy within a year or two was predicted recently by Dr. H. J. Bhabha, chairman of the Indian atomic energy board.

BOMBS COULD EQUAL TWO MILLION TONS

GLASGOW.—An atomic bomb could be made equivalent to 2,000,000 tons of high explosives, Dr. S. C. Curran of Glasgow University said at the opening of an atomic energy week here. Dr. Curran added that such a bomb now could be produced smaller in size than some of the bombs dropped on Germany.

Doctors Use Electric Shocks To Revive Boy As Pulse Stops

CHICAGO.—Electricity—a force that can stop a heart's beat—has been used by Cleveland physicians to revive the waning pulsations of a 14-year-old boy.

The Journal of the American Medical Association reports the patient's pulse stopped and blood-pressure sounds ceased after a chest operation.

The incision was reopened and manual massage of the heart begun. Some faint heart action was noted after 35 minutes of massage and mechanical respiration.

Two series of electric shocks, applied directly to the exposed heart, restored normal rhythm and the boy made a complete recovery.

Next War To Be Fought By Germs

Dr. A. H. Compton, Nobel Prize Winner, Warns Of Reversal In Warfare Tactics

LOS ANGELES.—The next war will be a war of germs which will wipe out all life, Nobel Prize winner Dr. Arthur H. Compton said.

He said an enemy marching into America would find all the homes and factories undamaged and ready for operation. There would be no fighting, because the defenders would be dead.

The scientist, here to meet with alumni of Washington University of St. Louis of which he is president, said the atomic bomb he helped develop was not the only great threat of future wars.

"When the Russians find out how much trouble it is to make a bomb, I wouldn't be surprised if they adopted some other weapon, possibly germ warfare," he said.

"Before they go the limit in the bomb development, they will turn to a means of spreading disease in an enemy country which very well in the future might prove the more effective. The Russians are very good in biological research."

BURGLAR EVIDENTLY WANTED A JOY-RIDE

INDIANAPOLIS.—A discriminating burglar who took the newest automobile from an agency showroom apparently just wanted a joy-ride.

Anyway, the company reported that the 1948 model was found behind its building, undamaged but with 400 added miles on the speedometer.

From now on, month by month

YOUR WAR SAVINGS CERTIFICATES can be cashed!

The payoff on War Savings Certificates has begun. Right now all War Savings Certificates issued in May 1940 are being redeemed by the Canadian Government at their full face value.

On or after December 15th, you can redeem all War Savings Certificates issued in June 1940... and so on, month by month, for the next few years.

If you are among the thrifty people who own War Savings Certificates, NOW is the time to look them over, sort them out by months and as they fall due, endorse them and mail to Ottawa as described on the back of each Certificate. A cheque for the full face value of each Certificate will be sent to you in due course.

But here is another suggestion...

Have The Royal Bank of Canada do all this "office work" and sorting for you. Save yourself the bother of searching out the right pieces of paper each month, endorsing them and mailing them off to Ottawa.

Here's what you do: Bring all your War Savings Certificates which you have at home or in your safe deposit box, to your nearest Royal Bank Branch. We will put them in our vaults for safekeeping.

As the Certificates fall due, we will cash them for you and deposit the full face value (which includes interest) in the savings account of the registered owner, automatically. If you have no account with us, we will open one for you for this purpose.

The cost of this service, including safekeeping until your Certificates mature, is low, as the following table shows.

SAFEKEEPING CHARGES FOR WAR SAVINGS CERTIFICATES, INCLUDING AUTOMATIC REDEMPTION WHEN DUE—

" " " " " "	306

If your Certificates are already lodged with us for safekeeping, we will arrange for their automatic redemption, as described above, at a nominal charge of 5¢ per Certificate, regardless of the face value.
